

VUTEk QS2000 & QS3220

Delivering more of the print quality, speed and performance your customers demand.

The VUTEk® QS Series UV-curing printers match High-Definition Print (HDP) capability with high production speeds, making them the superwide printers of choice for print shops with tight deadlines and customers who demand the highest image quality.

FEATURES:

- Provides HDP at resolutions up to 1080 dpi, with four or six-colour imaging and a special seventh channel for white ink.
- Delivers in-line, three-layer white printing capability, expanding your ability to take on a whole new range of applications and increase your profits.
- Crisp four-point text.
- QS2000: Speeds up to 70 square metres or 14 1,60 x 3,20 metre boards per hour.
- QS2000: Prints on rigid and flexible substrates up to 5.08 cm thick and 2 metres wide.
- QS3220: Speeds up to 84 square metres or 16 1.60 x 3.2 metre boards per hour.
- QS3220: Prints on rigid and flexible substrates up to 5.08 cm thick and 3.2 metres wide.
- QS3220: Increased rigid, sheet and roll-to-roll media hold down with an improved vacuum system.
- QS3220: Improved roll-to-roll media handling when coupled with the heavy-duty unwinder option for maximum performance.

APPLICATIONS:

- Exhibition graphics
- Point-of-purchase displays
- Signage
- Banners
- Posters
- Commercial graphics

VUTEk QS3250r

Roll-to-roll productivity meets high-definition quality.

The VUTEk® QS3250r roll-to-roll UV-curing printer combines HDP capability with high production speeds, making it perfect for sign shops, commercial printers and print providers looking to complement or replace existing solvent or UV output with uncompromised quality and UV roll-to-roll capability.

FEATURES:

- Delivers HDP print resolutions up to 1080 dpi for dazzling images and sharp text.
- Productivity up to 172 square metres per hour.
- Prints on a wide variety of flexible substrates up to 3 mm thick and 3.2 metres wide.
- Optimised with VUTEk ink, designed with superior flexibility characteristics for the QS3250r.

APPLICATIONS:

- Signs
- Banners
- Point-of-purchase displays
- Fleet graphics
