

liveprint offers:

liveprint offers you an easy-to-use tool to produce high quality and reasonably priced art prints in individual numbers. High quality artprints such as genuine canvas, watercolour paper with or without textured surface as well as a number of other papers and artists cardboards are available.

- 1 On the first screen, enter the number of the picture you want to produce for your customer and choose the selected print media (canvas, deckle edge and so on).
- 2 If your customer has already a frame, and wants to fit the selected picture into that, just enter the measurements of the visible area and the respective mounting edges.
- 3 If the customer has not chosen the frame yet, just start with entering the picture size and the surrounding borders.
- 4 In the final step **liveprint** shows a summary of the print job, reminds you to place the correct print media in the printer and displays the customer selling price. Hit the PRINT key with your mouse . Here you go!

Your customer is with you while printing his desired motif. He'll feel comfortable in your shop and you are able to use the short printing time in advising him concerning frame, mount and presentation.

Please feel free to get in touch with us!

Your **liveprint**-partner:

liveprint means:

- **liveprint** lets you reach customers that you have not been able to sell to before.
- Great variety and high quality are the factors that will warrant a good turnover.
- Not only the artist will get a commission per printout

liveprint:
PICTURES ON DEMAND
liveprint is a digital print system for the production of high quality art prints and posters on the spot in galleries for interior decorators, poster or museum shops and so on. You will see how easy you can handle **liveprint**.

- A huge selection of motifs of popular painters and graphic artists
- Outstanding quality and longevity of prints
- Each motif is available as often as you want it
- Printout in every format requested
- You print without PC knowledge
- From selection to print in 4 easy steps
- No shipping time
- No returns

„If I only had an intelligent machine that should be able to reproduce in such a way that the structure and quality could not be distinguished from the original, I would not only be a made man but also be rid of the worry of how to make my works easily available to the general public.“

Edouard Manet (1832 - 1883)

For you as a gallery owner it is essential to have a wide variety of pictures to gain customer interest. Only with a variety of exhibitions and a large portfolio you will be confident to face all your individual requirements. **liveprint** can help. Together with your customer you choose the suitable object from a sample folder that matches your gallery concept.

■ **The printout of the chosen picture is absolutely unique.** You can print the picture in any desired size (proportions will be balanced automatically).

■ **The print media used is available up to a width of 111 cm (44") and up to a length of 30.5m (100ft).** **liveprint** gives you the option to print on a variety of materials. In addition to high quality media like genuine canvas, watercolour paper with or without textured surface, a number of papers and artist cardboards are available.

■ **liveprint operates EPSON® ink-jet printers which guarantee a durability of the colours up to 75 years (depend on the media used).** **liveprint** prints all colours automatically and precisely.

The large pool of artists is continuously expanded and we would be pleased to add „Your“ artists to the **liveprint** system. At your choice for the production of high quality pseudo lithographies only or to present the artist to a larger group of potential customers.

Pferd in Landschaft, Franz Marc

Der Auserwählte, Leif Skogliöf

We have developed **liveprint** in such a way that its operation fits perfectly into the workflow of a gallery. The **GUI** is easy to use. In addition, the computer gained a number of design awards. Judge for yourself.

■ The **liveprint**-computer works as a so-called "kiosk application". As soon as the gallery owner starts it up, **liveprint** starts as well.

■ You don't have to worry about the colour. **liveprint** prints automatically all colours correct and precisely.

A large number of galleries have given us their input in the development phase and we listened and you will find these inputs in our system.
